

Dita Consulting works in partnership with RCC – Health and Safety, one of leading providers of Health & Safety and Environment management qualification training, which delivers NEBOSH, IOSH, CIEH, NVQ in Occupational Health and Safety at levels 3-5, accredited courses and other customized training and consultancy in all aspects of health, safety and environment; as well as a range of short courses designed to meet specific training needs.

### **Open & Short Courses**

With over 100 open training courses a year, mostly run at several venues in Essex and other parts of the UK, the open training courses format is the most cost-effective way for individuals and small groups to access our face-to-face learning

### **In-House Staff Training**

This option allows for greater tailoring of content and flexibility of delivery, as well as being the most cost-effective format for groups of seven or more. We design, develop, deliver, certificate and evaluate in-house training throughout England and Wales, and can also host organisations at our partner venues in the United Kingdom and overseas.

Bespoke commissions are possible and usually do not incur additional cost as we welcome all opportunities to add to our portfolio of courses.

Fully accredited by the CPD Accreditation Group, Registered Member of Association Healthcare Trainers and Providers.

We also collaborate with reputable tertiary institutions all over the world and credible local ones in developing and delivery of Public Health related training courses.

Training can be arranged for:

- Nursing Homes
- Residential Homes
- Hospices
- Hospitals
- General Practices
- Special Schools
- Pharmacies
